

Regupol®

Floor Covering for Golf Facilities

Spike-resistant, long-lasting, elastic and resilient

Floor Covering for Indoor and Outdoor Applications

Each kind of sports requires its own sports facility, equipment and accessories. Golf is no exception to that. BSW provides a wide range of various elastic and resistant floor coverings for the golf industry. Floor coverings in golf sports are exposed to high loads: shoes with spikes, caddies, golf clubs that pound the floor on the driving range make life tough for floorings. The spike shoes are particularly tough on the surface and will destroy most conventional flooring materials. The spikes themselves can wear off quickly if those are used on a blank concrete surface. Therefore, the floor material in a golf club must be cushioning, hard-wearing, slip-resistant and spike-resistant under indoor and outdoor conditions. BSW has developed many products with exactly these properties. These products have already been installed in hundreds of golf courses worldwide and have proven themselves for decades.

The Benefits

- Spike-resistant
- High resistance to mechanical stress and heavy traffic
- Long-lasting
- Abrasion-resistant
- Comfortable to walk on due to cushioning effect
- Protects the locomotor system
- Sound-absorbing
- Easy to install and maintain
- Recyclable

Additionally Available for Indoor Applications:

- A wide range of special colour combinations can be offered for individual designs
- Matt surfaces without any light reflections

Areas of Application

Regupol® Interlocking Pavers

Driving ranges and walkways

Regupol® Elastic Tiles

Driving ranges and walkways

everroll® performance flooring

For all indoor applications as caddy rooms, changing rooms, foyers as well as pro shops

Regupol® Interlocking Pavers

Regupol® Interlocking Pavers are perfectly suitable for all outdoor areas and paths where people walk and drive, especially for driving ranges and walkways. The compact pavers are easy to interconnect and can easily be combined with common concrete pavers due to their shape and measurements. **Regupol® Interlocking Pavers** are extremely resilient and durable even under tough conditions, including spike penetration and vehicle traffic. Starters and half pavers are available for the perimeter of an installation.

Regupol® Elastic Tiles

Regupol® Elastic Tiles are equally resistant against spike traffic, similar to the whole portfolio of flooring products for golf facilities available from BSW. The tiles are easy to install and extremely durable. They are best suitable for walkways and driving ranges, yet they are a good fit for other areas, too.

For further information on our **Regupol® Interlocking Pavers** and **Elastic Tiles** see unit **Impact Protection P2**.

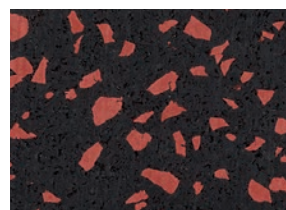

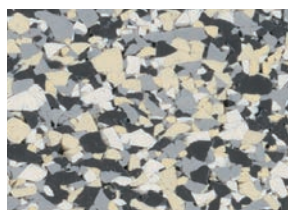

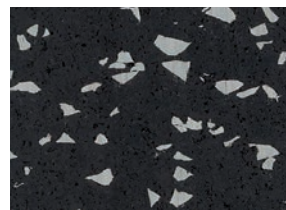

Regupol® Elastic Tiles EPDM

This version of **Regupol® Elastic Tiles** is supplied with a special EPDM top layer. The EPDM rubber granules used for the top layer are extremely colour-resistant, under all kinds of weather conditions. The durability and colour stability of these tiles is excellent. Our **Regupol® EPDM Elastic Tiles** are as resilient and shock absorbing as BSW standard **Regupol® Elastic Tiles** which make them perfectly suitable for many areas at golf club facilities.

everroll® resilient flooring

everroll® is suitable for the perimeter of an installation in caddy rooms, changing rooms, foyers and shops. **everroll®** is the perfect floor covering for areas where the floor is expected to withstand heavy traffic and mechanical stress such as the spike traffic through golf shoes. **everroll®** is spike-resistant with a minimum thickness of 10 mm. It reduces impact sound, is easy on joints as well as on ligaments and offers a high level of shock absorption.

This is just a small selection of our **everroll®** collection that contains in summary about 70 decors.

Detailed information regarding our **everroll®** floor coverings can be found in our “Sports Flooring Indoor” catalogue and under www.berleburger.com

Our attractive **Regupol®** Interlocking Pavers are perfectly suited for all outdoor areas and paths where people walk and drive, especially for driving ranges and walkways.

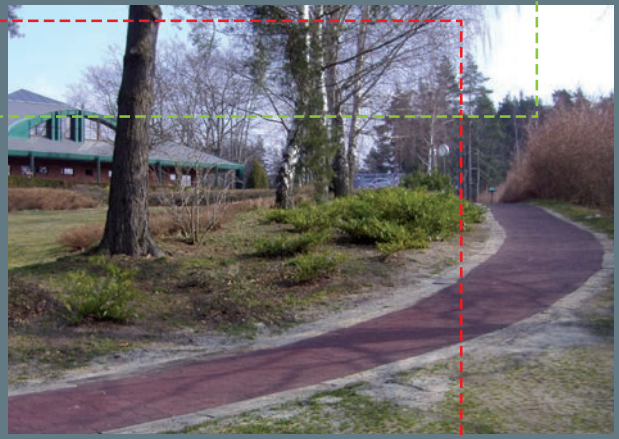

The compact **Regupol®** Interlocking Pavers are easy to interconnect. They are extremely resilient and durable even under tough conditions, including spike penetration and vehicular traffic.
